

## Field Service Bulletins - JD Tractor Magnetos

**Field Service Bulletins -- JD Engineering Guidance** --Here we have the essence of John Deere Guidance to their service men as relates to magnetos and spark plugs, service hints & helps, fixes for problems encountered, guidance on interchangeability, and full-blown Service Instructions for each of the five main magnetos used on John Deere tractors.

**Spans over nearly Two Decades** -- All FSB data issued to JD service men from May 1935 to December 1953 was scanned to prepare this offering.

**All five Magneto Types are included** -- Fairbanks-Morse, Edison Splitdorf, and WICO Types "AP", "C" and "X". This CD contains **Full-Blown Service Instructions** for each in the forms of Field Service Bulletins 124-S (Fairbanks-Morse), 125-S (Edison Type "CD"), 126-S (WICO Type "AP"), 127-S (WICO Type "C" and 159-S (WICO Type "X") -- accounting for 20 pages chock full of detailed instructions.

**Data from 30 Field Service Bulletins are provided** -- Either in whole or in part -- data being taken from over 50 Field Service Bulletin pages, and presented in one printable PDF file. Pages are in very "easy on the eye" format insofar as was practical.

**More** -- This CD contains several **appendices spanning yet another 50 pages** in a separate printable PDF file.

**Value Comparison** -- In recent days, we have seen **FSB 159-S alone (Only 8 pages!)** being marketed for over \$20. That comparison would make this CD worth at least \$150! However, as you can see, it is being offered for far less and is a super buy for a person seeking to know the JD engineering mind insofar as magneto-based ignition systems for two-cylinder tractors is concerned.

**Trial** -- Try it! I am convinced you will like this product, and if not satisfied, your money is refunded at your request!
